Legal Daily: [Assisting Police in Solving Over 2,000 Fraud Cases: Kuaishou Releases 2026 Anti-Fraud Governance Report](#)

On June 30, Kuaishou released the 2026 Anti-Fraud Governance Report. The report shows that over the past year, in strict compliance with the Anti-Telecom and Online Fraud Law and other laws and regulations, Kuaishou's anti-fraud team has continued to fulfill the platform's primary responsibilities, comprehensively enhancing its telecom and online fraud governance capabilities across AI large model empowerment, risk control model strategy iteration, identification and alerting of vulnerable groups, fraud-related data sharing, police-enterprise coordinated enforcement, and online-offline anti-fraud publicity. The platform proactively intercepted and blocked 98.1% of fraudulent activities, improved its proactive identification and governance capabilities for fraud-related accounts by more than fivefold, and saw significant year-on-year declines in reports of multiple types of typical fraud.
