

Kuaishou Supplier Information Security Management Regulations

These regulations aim to optimize the quantity, quality, value and procurement efficiency of any procurement of Kuaishou and its related companies and regional branches (branches, offices and representative offices). The procurement department shall select quality suppliers and conduct reasonable supervision, assessment and evaluation of them, so as to ensure that such suppliers continue to provide quality products.

These regulations are applicable to any supplier which has provided or will provide any products to Kuaishou and its related companies and regional branches (branches, offices and representative offices).

In the process of selecting suppliers, procurement personnel shall be responsible for ensuring that the following conditions are met through compliant procurement measures:

- (1) selecting cost-effective suppliers and comprehensive consideration of the service quality, overall procurement cost (including price, usage cost, management cost, etc) of suppliers;
- (2) ensuring the fair price of procurement. The fair price refers a competitive price that the Company would pay to obtain services or products from the supplier under specific market conditions and time periods; and (3) ensuring that such supplier has corresponding information security protection capabilities and measures and complies with relevant laws and regulations.

In order to protect the data security of the Company and its users, Kuaishou shall conduct privacy and data security check on a regular basis.
